

Selected list of skill to be tested for the medical graduates: DRAFT

1. Demonstrates BP, pulse, Spo2 measurement
2. Demonstrations / Performs Auscultation of Heart, identifying murmur
3. Demonstration/Performs Auscultation of lungs, identifying abnormal breath sound
4. Performs Abdominal examination
5. Demonstrates Airway maneuver
6. Demonstrates Bag & mask ventilation
7. Demonstrates Chest compression
8. Demonstrates / Performs Cervical collar application
9. Demonstrates Essential newborn care
10. Demonstrates Ophthalmoscopy (technique only)
11. Identification of papilledema on ophthalmoscopy
12. Removal of foreign body from eye, ear, nose
13. Demonstrates Otoscopy (technique only)
14. Demonstrates Mini mental state examination
15. Demonstrates Examination of brain stem function
16. Demonstrates Nebulization / MDI use
17. Performs Donning of PPE
18. ECG interpretation
19. X-ray interpretation
20. Prescription writing
21. Performs/Demonstrates Hand washing
22. Performs/Demonstrates Gloving technique
23. Identifying different oxygen delivery devices and use appropriately
24. Demonstrates / Performs Kangaroo mother care
25. Demonstrates Tuning fork test and differentiating SN from conductive hearing loss
26. Taking informed consent for surgical procedures
27. Counseling (Family planning, breast feeding, lifestyle modification, chronic diseases, alcohol, smoking, consenting for surgery, breaking bad news)
28. Cranial nerve examination
29. Demonstrates of deep tendon reflexes
30. Assessing level of consciousness/ Glasgow coma scale
31. Triage patients
32. Immunization schedule counseling
33. Medico-legal report writing (injury report, sexual assault, suicide/homicide, postmortem)
34. Performs/demonstrate intramuscular, intravenous, subcutaneous injection
35. Performs/demonstrates venipuncture
36. Demonstrates urinary catheterization

37. Demonstrates nebulization/aerosol therapy
38. Performs/demonstrates compression bandage
39. Applies basic splints and slings
40. Demonstrates visual acuity testing
41. Performs eye irrigation and ocular bandaging
42. Demonstrates Per speculum and per vaginal examination
43. Demonstrates pap smear collection and interprets it
44. Performs/Demonstrates obstetric examination
45. Performs/Demonstrates episiotomy
46. Demonstrates Normal Labour and delivery along with partogram
47. Performs/Demonstrates Manual removal of placenta
48. Setting up Pediatric IV infusion and calculating drip rate
49. Demonstrates basic suturing
50. Demonstrate wound care and basic bandaging
51. Performs/Demonstrates Anterior nasal packing
52. Performs/Demonstrates incision and drainage of superficial abscess
53. Demonstrates early management of trauma and trauma life support
54. Demonstrates neonatal resuscitation
55. Demonstrates per rectal examination
56. Take informed consent for surgery from a standardized patient
57. Detect signs of raised intracranial pressure
58. Calculates drug dosage correctly and prescribes drugs for given problem
59. Interpretation of basic lab investigations
60. Demonstrates Defibrillation and cardioversion
61. Performs/Demonstrates Pleural tapping
62. Performs/Demonstrates Ascitic tapping
63. Performs/Demonstrates Chest tube insertion and drainage
64. Performs/Demonstrates lumbar puncture
65. Performs/Demonstrates nasogastric tube insertion
66. Performs/Demonstrates deep tendon reflexes
